## Education:

MSc (IT)- 2024-2026

LJ Institute of Computer Applications

BSc (IT)- 2021-2024

LJ Institute of Computer Applications

## Research & publications

Presented research paper titled,

“Metaverse Demystified: Design Insights, Deployment, Intricacies and Mitigations”

At ICRAECA – Feb 2025.

Currently under process for publication.

## Experience:

Visiting Faculty

July 2024-Present

*LJ Institute of Computer Applications*

- Successfully delivering hands-on sessions on Django and formerly ASP.NET MVC
- Designed and executed lesson plans incorporating live coding, project-based learning, and interactive discussions
- Enhanced technical presentation, content structuring, and public speaking skills through continuous feedback and reflection

## Soft Skills:

Quick Adaptability, Communication,

Leadership, Team & Project management,

Content delivery

## Technical Skills:

*Languages:* C/C++, Python, JavaScript, SQL

*Frameworks & Others:* MERN, MEAN,

Django, ASP.NET MVC,

*Databases:* MYSQL, MongoDB

*Other Tools:* Git & GitHub, Postman,

ChatGPT, MS-Office

## Academic projects

*SkillSwap (MEAN):* Peer-to-peer skill exchange platform with JWT authentication, Google OAuth, role-based access control, and real-time communication.

*Task Management (MERN):* Collaborative task board with real-time updates, comment system, and role-based access

*Crypto Forecasting & Analysis (Python, Jupyter):* Time-series analysis and ML-based prediction of cryptocurrency price trends using historical data.

*Healthcare Web Application (Django + MongoDB):* Patient management system with appointment booking, medical records, and doctor-patient interaction.
